

1/3 Frame bag / Pattern Manual

Please cut a paper pattern matching your frames measurements.
Write us an email and post your paper pattern to the workshop at the address below.

The more precise your paper pattern the better!

- Please mark the following parts: bottle cage eyelets, cable guides, derailleur clamp and any other braze-ons your frame may have.
- When preparing the pattern please ensure that water bottles are in place and that the pattern does not foul them or impede access. How much clearance you give will depend on which bottles and cages you use. See image below for guidance
- Also give an indication of the diameter or circumference of your frames tubing
- Please indicate on which side you would like the zipped opening to be: the drive-side or the Non-drive side

(One Zipper is included in the base price)
